

STETCO®

MUNICIPAL DRAINAGE SOLUTIONS

Versatile and dynamic, the Stetco line of products are ideal for mitigating even the most challenging municipal drainage infrastructure issues, delivering thoroughly clean storm water and drainage structures with an unparalleled level of ease and reliability.

Stetco is a true pioneer in the catch basin cleaning industry, having invented and commercialized the innovative Orange Peel, Rectangular Clamshell and Round Clamshell claw.

STETCO—Highly Effective Equipment

- Removes high volumes of heavy, compacted debris of various shapes, size and weight from: storm water structures, catch basins, culverts, trash racks, creeks, etc.
- Claw squeezes out water while extracting blockage materials for most efficient removal process.
- Solid debris enables more compact hauls to dump.
- Captures all typical and non-typical debris, including bricks, shopping carts, bike frames, timbers, etc.

OUR SPECIALTIES

High Uptime, Low Operating and Ownership Costs

Best-in-Class Hydraulic Catch Basin Cleaners

Reaches Depths up to 45 Meters Below Grade

Customizable Products Ensure Proper Needs Met

Bucket Easily Handles Heavy Debris, Squeezes Out Water Simultaneously

Performs In Any Climate or Weather Condition, Extreme Temps No Problem

Quiet Operating Volume

Cost Effective Compliance with EPA Storm Water Mandates and BMP Compliance

Enhances Response Capability to Unique Storm Water Maintenance Scenarios

Multi-purpose Debris Collection

OUR PRODUCTS

Stetco Loaders

- 920SP/14
- 950T/13
- 950T/15
- Debris Bodies

Stetco Combination Unit

Features high pressure/ low volume water jetting to clean laterals
